Stakeholders Mapping

Over the initial six months, the consortium partners undertook a comprehensive mapping analysis of the ecosystem pertaining to the health sector through which more than 70 stakeholders actively in the health sector were identified. To gather the data, at the consortium level was designed and disseminated within the partners ecosystems. This survey served as a vital tool for collecting insights, perspectives, and crucial information directly from the stakeholders themselves. Through structured questions and targeted outreach efforts, the partners engaged with stakeholders across the quadruple helix, ensuring a comprehensive understanding of the ecosystem's dynamics.
